

# Exercise 7.1

(a)

$+\Leftrightarrow \text{True}$   
 $-\Leftrightarrow \text{False}$

Want "True" if any of  
 $\oplus$  regions are True.

$\Rightarrow$  Take "OR"

$$f = \bar{h}_1 h_2 h_3 + h_1 \bar{h}_2 h_3 + h_1 h_2 \bar{h}_3$$

OR

(b) In general, form  $f$  as a sum of product terms over each  $(+)$  region

Q2

Feed Forward:  $x_4 = w_{14}x_1 + w_{24}x_2$

$$x_5 = w_{15}x_1 + w_{25}x_2$$

$$x_7 = w_{37}x_3 + w_{47}\theta(x_4) + w_{57}\theta(x_5)$$

$$x_8 = w_{68}x_6 + w_{78}\theta(x_7)$$

Output unit error derivatives:

$$\frac{\partial E}{\partial x_8} = -2(y - \theta(x_8))\theta'(x_8)$$

Backpropagation:

$$\frac{\partial E}{\partial x_7} = \frac{\partial E}{\partial x_8} w_{78} \theta'(x_7), \quad \frac{\partial E}{\partial x_5} = \frac{\partial E}{\partial x_7} w_{57} \theta'(x_5), \quad \frac{\partial E}{\partial x_4} = \frac{\partial E}{\partial x_7} w_{47} \theta'(x_4)$$

weight derivatives:

$$\frac{\partial E}{\partial w_{14}} = \frac{\partial E}{\partial x_4} \cdot x_1, \quad \frac{\partial E}{\partial w_{15}} = \frac{\partial E}{\partial x_5} \cdot x_1$$

$$\frac{\partial E}{\partial w_{24}} = \frac{\partial E}{\partial x_4} \cdot x_2, \quad \frac{\partial E}{\partial w_{25}} = \frac{\partial E}{\partial x_5} \cdot x_2$$

$$\frac{\partial E}{\partial w_{37}} = \frac{\partial E}{\partial x_7} \times 1, \quad \frac{\partial E}{\partial w_{47}} = \frac{\partial E}{\partial x_7} \times \theta(x_4), \quad \frac{\partial E}{\partial w_{57}} = \frac{\partial E}{\partial x_7} \cdot \theta(x_5)$$

$$\frac{\partial E}{\partial w_{68}} = \frac{\partial E}{\partial x_8} \times 1, \quad \frac{\partial E}{\partial w_{78}} = \frac{\partial E}{\partial x_8} \cdot \theta(x_7)$$
